

ICDL Perform Image Editing Functions (Adobe Photoshop)

 COURSE DURATION
24 Hrs MODE OF TRAINING
Classroom

This module enables the learner to understand the main concepts underlying digital images and to use an image editing application to enhance images, apply effects, and prepare an image for printing and publishing.

Course Objectives

- Understand the main concepts of using digital images; understand graphic format options and colour concepts.
- Open an existing image; save an image in different formats; set image file options.
- Use built-in options, such as displaying toolbars, palettes, to enhance productivity.
- Capture and save an image; use various selection tools; manipulate images.
- Create and use layers; work with text; use effects and filters; use drawing and painting tools.
- Prepare images for printing or publishing.

Who Is This Course For

- This course is intended for learners with little or no knowledge of using an image editing application to edit digital images.
