

WordPress Ecommerce Essential

SOA: Website Design

Description

WordPress is a free, open-source content management system (CMS) used by more than 60 million websites, written in PHP and paired with a MySQL or MariaDB database. Features include a plugin architecture and a template system, referred to within WordPress as Themes. WordPress was originally created as a blog-publishing system but has evolved to support other types of web content including online stores.

This intensive 2-day WordPress Ecommerce course will equip learners with practical WordPress building methodology and strategies, and it covers the fundamentals of WordPress ecommerce, from creating pages, creating posts, to selecting and installing plugins.
