

ICDL - Perform Advanced Spreadsheet Functions (Microsoft Excel)

COURSE DURATION

17 Hrs

MODE OF TRAINING

Classroom

ICDL Advanced Spreadsheets is a high-level certification programme which presents learners with the opportunity to bring their spreadsheet skills to an expert level. This allows them to use the full potential of the spreadsheet application to produce higher quality management information.

Course Objectives

By the end of this course, learners will be able to:

- Produce higher quality information
- Pinpoint key information quicker and more easily
- Provide more sharply-defined analysis
- Produce more sophisticated reports
- Use advanced editing, data handling, functions and analysis features
- Use macros within the spreadsheets application

Target Audience

- Prospective learners should ideally have the ICDL certification and/or previous experience using computers and common software applications. Typically, these would be individuals who use a wide range of advanced functionalities within a spreadsheet application in a personal or professional context. Spreadsheet applications enable learners to manipulate and produce precise information and conduct crucial data analysis. The ICDL Advanced Spreadsheets certification has been specifically designed to provide learners with the skills to exploit the full potential of the spreadsheet application.
