JAMES COOK INSTITUTE

Power Query & Power Pivot

COURSE DURATION
8 Hrs

MODE OF TRAINING
Classroom

Enhance your skills with our Microsoft Excel Power Query and Power Pivot Course. This training is designed for individuals looking to master advanced data preparation and analysis techniques using Excel. Learn how to automate data tasks and employ powerful data modelling tools like Power Query, Power Pivot, and DAX (Data Analysis Expressions). This course is ideal for professionals eager to improve their decision-making skills through efficient large dataset analysis.

FULL FEE

$387

(Subject to 9% GST)

Course Objectives
By the end of this course, learners will be able to:
- Apply Power Query to connect and import data from various sources
- Perform data cleaning and transformation tasks, preparing data effectively for analysis
- Apply Power Pivot to enrich and calculate data using DAX (Data Analysis Expressions)
- Create relationships between different data tables and integrate these into a comprehensive data model within Excel
